

UNIVERSAL MANUAL · ENTIRE CATEGORY

INSTRUCTIONS FOR USE

BDSM Accessories, Restraints, Gags & Masks

This document is a **universal instructions-for-use manual valid for the entire product category BDSM Accessories, Restraints, Gags & Masks** (wrist and ankle restraints, gags, blindfolds and hoods, collars, leashes, chastity belts, and more), not for a single specific product. It contains safety, usage, and care information common across the entire category, including the principles of safe and responsible play.

05	Care & cleaning	8
06	Storage	9
07	Troubleshooting	10
08	Disposal & recycling	11
09	Responsible person & contact	12

IMPORTANT

Keep all of this information for safe and correct use. Also keep the product packaging, as it contains the instructions for use and information about the product, batteries, and charging. For more information, scan the QR code on the packaging.

Your safety and the safety of your partner come first for us. Please read and follow all of the instructions below carefully before use.

- Keep out of reach of children, as small parts may be swallowed.
- Only use the product if you are in good physical condition.
- Do not use the product with other persons against their will. Only use the product with the consent of everyone involved.
- Gags and masks can seriously impair breathing (e.g. due to a tight fit and small or missing breathing holes) and, in the worst case, can lead to death.
- In the event of vomiting or a risk of suffocation, remove the product immediately, as the airway could become blocked.
- Use the product safely to avoid injury. Use the product at your own risk.
- If a person has any medical concerns or conditions, they should consult a doctor before using the product.
- Do not use the product on injured or irritated skin.
- Never leave a restrained, defenceless person alone.
- A restrained person must always be able to breathe freely through the nose.
- If very uncomfortable skin tension, irritation, bruising, discolouration, or other physical discomfort occurs during use, remove the product immediately and consult a doctor if necessary.
- To prevent illness and infection, do not pass the product on to third parties.
- Read the information on the product packaging carefully to avoid allergic reactions (e.g. to latex).
- Do not use the product if it is obviously not working properly, is overheating, or shows visible defects.
- Do not freeze or heat the product.
- The product is not suitable for commercial use.
- Do not inflate inflatable products beyond the diameter stated on the packaging.
- The product is not suitable for medical use.

**WARNING**

No liability can be accepted for damage or accidents caused by improper use, the use of force, modifications, or failure to follow these safety instructions.

1

Cleaning

Before first use, clean the product with a slightly damp cloth.

2

Drying

To prevent corrosion on metal parts and mould on leather, let the product dry thoroughly.

**TIP**

Keep the product packaging – it contains the instructions for use and product information. For more information, scan the QR code on the packaging.

**BEFORE YOU BEGIN**

In case of an emergency (e.g. shortness of breath, numbness, circulation problems), keep emergency scissors or a seatbelt-style knife ready to quickly cut through ropes and restraints, OR keep (spare) keys for restraints ready, or open restraints using an "emergency release".

**ROPES**

Never wrap ropes around the neck — there is a risk of strangulation. Do not tie ropes too tightly, as they may restrict blood flow. Our ropes are not load-tested and are therefore not suitable for securing loads, climbing, etc.

1

Placement

Place the product on, e.g., the wrists, ankles, neck, head, etc. Start carefully and tighten the product as needed. Important: You can find the procedure for using or fitting the product in the image on the product packaging.

2

Adjusting the size

Securing: adjust the buckle hook or strap to the desired size — some restraints have carabiners and a connecting chain; use the carabiners to link the individual restraints together. Cuffs: secure with carabiners to the desired size — some cuffs have removable plush covers that can be taken off to increase intensity. Gag: adjust the hook-and-loop closure or buckle to the desired size.

3

Removal

Open the product and slowly remove it from the body.

**IMPORTANT**

Never leave a restrained, defenceless person alone. A restrained person must always be able to breathe freely through the nose.

The following features apply only to selected models — check which features your specific product offers.

- Some gags are fitted with a squeeze-bulb pump. To increase the diameter of the gag, repeatedly squeeze the pump bulb as needed. The gag will inflate. To release the air, open the valve.
- Always take care not to over-inflate the gag, as in the worst case this can block the throat or windpipe, which can lead to suffocation.
- Some gags have a (removable) vibrator. Apply a sufficient amount of lubricant to the surface of the vibrator. A water-based lubricant is recommended.
- To prevent any illness, thoroughly clean and disinfect the product after each anal use before continuing to use it vaginally.

Most items in this category (restraints, gags, masks, floggers, ropes) have no electronic components. This chapter applies only to models with a vibration or other electronic function, if the specific product is fitted with one.

- Only charge the product with a suitable charger plugged into an electrical outlet, following the instructions for the relevant adapter.
- For safety reasons, lithium batteries are shipped charged to only 40–50% — fully charge the product before first use.
- If the product switches off automatically due to low battery, do not switch it back on — charge it at an outlet instead.
- To extend battery life, disconnect the product from the power source as soon as the battery is fully charged, or remove the batteries after each use.

**TIP**

Do not leave the product charging unattended for long periods, and use only original or manufacturer-recommended accessories.

Clean the product with a slightly damp cloth after each use. To prevent corrosion on metal parts and mould on leather, let the product dry thoroughly and store it outside of plastic bags.

Nylon & cuffs

- Nylon restraints: to avoid damaging the product, hand-wash only.
- Cuffs: to avoid damaging the product, remove the plush covers if necessary and hand-wash them.

Masks & ropes

- Masks: to avoid damaging the product, hand-wash masks only, using water with a small amount of mild detergent.
- Ropes: occasional care with a little oil or wax keeps rope supple and protects it from drying out.

IMPORTANT

To prevent any illness, thoroughly clean and disinfect the product after each anal use before continuing to use it vaginally.

- Store the product in a clean, cool, and dry place. Avoid direct sunlight and high humidity.
- To prevent chemical reactions, store the product separately, not together with other products made of different materials.

The lock or buckle on the restraints is hard to open.

Check you are using the correct key or lock mechanism; never use excessive force — in an emergency, use emergency scissors or a seatbelt-style knife to cut the strap/rope.

A leather part has hardened or cracked.

Check that you are drying the product thoroughly after each use, as described in the "Care & cleaning" chapter. If the damage is significant, stop using the product.

Metal parts are rusting or sticking.

Dry thoroughly after each wash and store in a dry place away from high humidity.

The vibration function (on selected models) is not responding.

Check the battery charge level as described in the "Charging & battery" chapter.

CAUTION

If the problem persists even after trying the steps above, stop using the product and contact Lechtivo.cz customer support.

- Dispose of old products and packaging in accordance with the legislation of your country.
- Separate packaging by material and dispose of it with household waste.
- Non-electronic products can simply be thrown away with residual waste.

For electronic models (e.g. vibrating gags), additionally:

Electronic waste

- The crossed-out wheeled bin symbol means the product must be handed in free of charge at a WEEE (electronic waste) collection point for recycling.

Batteries

- Batteries do not belong in household waste. As a consumer, you are legally required to hand in used batteries at a public collection point or a battery retailer.

ENVIRONMENT

By recycling, you help protect the environment and enable the best possible reuse of raw materials.
