

UNIVERSAL MANUAL • ENTIRE CATEGORY

INSTRUCTIONS FOR USE

Dildos

This document is a **universal instructions-for-use manual valid for the entire product category Dildos**, not for a single specific product. It covers classic dildos, dildos with a tip for G-spot stimulation, suction-cup dildos, inflatable dildos with a pump bulb, glass dildos, and dildos suitable for anal use. It contains common safety, usage, and care information applicable across the whole category.

IMPORTANT

Keep all of this information for safe and correct use. Also keep the product packaging, as it contains operating instructions and product information. For more information, scan the QR code on the packaging.

Your safety is our top priority. Before using the product, please read and follow all instructions below carefully.

- Keep out of reach of children, as small parts may be swallowed.
- Use the product only if you are in good physical condition.
- Do not use the product on other people against their will. Use the product only with the consent of everyone involved.
- Use the product safely to avoid injury. Use the product at your own risk.
- If a person has any health issues or concerns, they should consult a doctor before using the product.
- Do not use the product on sick or irritated skin.
- If unpleasant skin irritation or physical discomfort occurs, stop using the product immediately. If symptoms persist, consult a doctor.
- To prevent illness and infection, do not pass the product on to third parties.
- Read the information on the product packaging carefully to avoid allergic reactions (e.g. to latex).
- Do not use the product if it is visibly not working properly, is overheating, or has visible defects.
- Do not freeze or heat the product.
- The product is not suitable for commercial use.
- Do not inflate inflatable products beyond the diameter stated on the packaging.
- The product is not suitable for medical use.

**WARNING**

No liability can be accepted for damage or accidents caused by improper use, the use of force, modifications, or failure to follow these safety instructions.

- Before first use, clean the product with warm water and mild soap.

**IMPORTANT**

To prevent any illness, thoroughly clean and disinfect the product after each anal use before continuing to use it vaginally.

1**Apply lubricant**

Apply a sufficient amount of lubricant to the surface of the product. Important: we recommend using a water-based lubricant.

2**Insert the product**

Insert the product into the vagina and/or anus.

3**Remove the product**

Slowly remove the product from inside the body.

The following features apply only to selected models — check which functions your specific product offers.

- Models with a G-spot tip: to stimulate the G-spot, hold the curved tip facing the abdominal wall.
- Models also suitable for anal use: to avoid injury during penetration, gently relax the sphincter muscle before anal intercourse. Proceed slowly and, if necessary, relax the anus beforehand with circular finger movements. For anal use, use only a specialized lubricant and always hold the product firmly to prevent it from slipping fully into the anal opening.
- Models with a squeeze pump bulb: to increase the product's diameter, repeatedly squeeze the pump bulb — the dildo will inflate. To let the air out, open the valve.
- Models with a suction cup: allow the product to be attached to a smooth, clean, and dry surface. Carefully detach the suction cup from the surface.
- Glass dildos: for temperature play, they can be warmed on a heater or chilled in the refrigerator.
- Models with a squirting function: fill the squirting bulb with liquid and squeeze it repeatedly as needed.

- After each use, clean the product with warm water and mild soap and disinfect it with a disinfectant solution suitable for the product.

- Store the product in a clean, cool, and dry place.
- Avoid direct sunlight.
- To prevent chemical reactions, store the product separately, not together with other products made from different materials.

**TIP**

It is advisable to use the fabric storage pouch supplied with the product for storage, if included.

The product slides or is difficult to insert.

Apply a larger amount of water-based lubricant and repeat the process more slowly.

An unpleasant smell is noticeable after use, or the material changes color.

Check that you are cleaning and drying the product properly after each use, per the "Cleaning & maintenance" chapter. If the problem persists, stop using the product.

The suction cup or pump mechanism does not work reliably (on selected models).

Make sure the surface is clean, smooth, and dry; check the pump bulb for damage.

Skin irritation occurs.

Stop using the product immediately and follow the "Safety information" chapter. If problems persist, consult a doctor.

CAUTION

If the problem persists even after trying the steps above, stop using the product and contact Lechtivo.cz customer support.

- Dispose of old products and packaging in accordance with national legal regulations.
- Separate packaging by material and dispose of it together with household waste.
- Non-electronic products can simply be thrown away with residual waste.

ENVIRONMENT

By recycling, you contribute to protecting the environment and to the best possible reuse of raw materials.
