Contents

01	Before first use	3
02	Caring for lace, mesh & satin	4
03	General information for latex & vinyl	5
04	Vinyl catsuit care	6
05	Latex catsuit care	7
06	Troubleshooting common issues	8
07	Disposal & recycling	9
08	Responsible person & contact	10

IMPORTANT

Before first use, please read this entire instruction manual carefully and keep it for future reference — it is an integral part of the product.

- Before wearing for the first time, check the size and fit against the product's size chart.
- Wash items of the same colour only together to prevent lighter materials from being dyed.
- Handle items with stones, pearls, sequins and other embellishments with special care — see 'Caring for lace, mesh & satin'.
- Always wear underwear underneath when trying on a piece.
- With delicate lace and mesh, avoid contact with sharp jewellery or long fingernails, which could tear the material.

- Wash lace, mesh and satin lingerie by hand in lukewarm water (up to 30 °C) with a mild detergent for delicates whenever possible.
- If machine-washing, place the item in a lingerie mesh bag and use a delicate or cold hand-wash cycle.
- Do not use bleach or fabric softener — they can damage lace and mesh fibres or discolour satin.
- Never wring the item or tumble-dry it. Blot out excess water in a towel and let it air-dry flat, away from direct sunlight and heat sources.
- Protect metal hardware (hooks, rings, clasps) from moisture to prevent corrosion.
- Store boned corsets and bodysuits laid flat or hung up, not crumpled, to preserve the shape of the boning.

**TIP**

Turn delicate pieces with stones or sequins inside out before washing to reduce the risk of snagging or losing embellishments.

- Latex catsuits are made using natural rubber latex, which may cause allergic reactions in sensitive individuals.
- Before putting the catsuit on, lightly dust the inside with latex powder or use a special oil suitable for latex products. This makes it easier to put on and protects the material from damage such as tears.
- Both latex and vinyl are stretchy but easily damaged materials. When dressing, avoid sharp objects such as hairpins, jewellery and long fingernails.
- Roll up sleeves and legs as much as possible before putting the catsuit on, and unroll them gradually to avoid tearing.
- Operate zips and other fastenings slowly and carefully to avoid snagging the material.

- After each use, hand-clean the catsuit with clean lukewarm water and a mild cleaning agent.
- After washing, dry the item with a soft, lint-free cloth.
- Lay the catsuit out on a towel to dry. Let the inside dry first, then the outside. Make sure zips and details are completely dry.
- Store the product in a clean, cool and dry place. Avoid direct sunlight and high humidity.
- To prevent chemical reactions, store the product separately, not together with other products made from different materials.
- Avoid storing it together with items of different colours or in (dark) plastic bags — this can cause discolouration. If needed, use a cotton garment bag.
- Vinyl catsuits tend to wrinkle. To keep the product wrinkle-free for as long as possible, hang it on a hanger after cleaning.

- After each use, hand-clean the catsuit with clean lukewarm water and a special cleaning agent or mild soap. Rinse off any soap residue with cold water.
- After washing, dry the item with a soft, lint-free cloth.
- Lay the catsuit out on a towel to dry. Let the inside dry first, then the outside. Make sure zips and details are completely dry.
- Once completely dry, lightly dust the product with latex powder before storing.
- Store the product in a clean, cool and dry place. Avoid direct sunlight and high humidity.
- To prevent chemical reactions, store the product separately, not together with other products made from different materials.

**TIP**

If you want a high-gloss finish, we recommend using a latex shine spray.

Lace or mesh lingerie has lost its stretch or shape after washing.

Wash by hand only, or in a mesh bag on a delicate cycle; never wring or tumble-dry — see 'Caring for lace, mesh & satin'.

The latex catsuit is difficult to put on.

Lightly dust the inside with latex powder, or use a special latex oil as described in 'General information for latex & vinyl'.

A tear has appeared on the vinyl or latex catsuit.

The material is easily damaged — avoid sharp objects when dressing and handling it. Do not continue wearing a damaged item.

Metal hooks, rings or clasps on the lingerie have rusted.

Protect metal hardware from moisture and let the item dry thoroughly after each wear before storing it.

WARNING

If the problem persists even after trying the steps above, please contact [Lechtivo.cz](https://lechtivo.cz) customer support.

- Dispose of old products and packaging in accordance with the legislation of your country.
- Sort packaging by material and dispose of it together with household waste.

ENVIRONMENT

By recycling, you help protect the environment and enable the best possible reuse of raw materials.
