## IMPORTANT

Before first use, please read this entire instruction manual carefully and keep it for future reference. This manual is an integral part of the product.

Your safety is our top priority. Before using the product, please read and follow all the instructions below carefully.

- Keep out of reach of children, as small parts may be swallowed.
- Only use the product if you are in good physical condition.
- Do not use the product with other people against their will. Only use the product with the consent of all persons involved.
- Use the product safely to avoid injury. Use the product at your own risk.
- If a person has any health problems or concerns, they should consult a doctor before using the product.
- Do not use the product on injured or irritated skin.
- If unpleasant skin irritation or physical discomfort occurs, stop using the product immediately. If symptoms persist, consult a doctor.
- To prevent illness and infection, do not pass the product on to third parties.
- Read the information on the product packaging carefully to avoid allergic reactions (e.g. to latex).
- Do not use the product if it is clearly not working properly, is overheating, or has visible defects.
- Do not freeze or heat the product.
- The product is not suitable for commercial use.
- Do not inflate inflatable products beyond the diameter stated on the packaging.
- The product is not suitable for medical use.

**WARNING**

No liability can be accepted for damage or accidents caused by improper use, use of force, modifications, or failure to comply with these safety instructions.

1

**Cleaning**

Before first use, clean the product with warm water and mild soap.

2

**Assembly (if applicable)**

For selected models, assemble the individual parts of the product before use.

**TIP**

Keep the product packaging – it contains the instructions for use and product information. Scan the QR code on the packaging for more information.

1

**Removing the cap**

If necessary, remove the cap from the product's opening.

2

**Lubrication**

Apply a sufficient amount of lubricant to the sleeve and opening of the product, as well as to the penis.

3

**Insertion**

Insert the erect penis into the product.

4

**Stimulation**

Move the product up and down to stimulate your penis with the internal texture.

5

**Removal**

Slowly remove the product from the penis.

**IMPORTANT**

A water-based lubricant is recommended. To increase friction on the penis, you can hold the sleeve more firmly with your hand — this reduces its internal diameter.

The following features apply only to selected models — check which features your specific product offers.

- Some masturbators can be used on both sides and have two openings for penetration.
- Some masturbators have a pump bulb. Squeeze the pump bulb, repeatedly if necessary, to increase friction on your penis. The sleeve will inflate and the internal diameter of the masturbator will decrease.
- To increase suction inside the product, partially or fully close the opening at the other end of the product with your finger, or turn the cap at the other end of the product.
- Some masturbators have a suction cup that allows the product to be attached to a smooth, clean, and dry surface. Carefully detach the suction cup from the surface.

Clean the product after each use. Proceed as follows:

- 1 If necessary, remove the sleeve from the casing.
- 2 You may want to turn the sleeve inside out.
- 3 Soap the surface with a mild soap.
- 4 Rinse the surface with warm water.
- 5 Dry the surface with a lint-free cloth.
- 6 If necessary, disinfect the surface and dry it again.
- 7 If necessary, return the sleeve to its original position and repeat steps 4 to 6.
- 8 If necessary, clean the other parts of the product.

**TIP**

To protect and preserve the delicate surface of the sleeve, apply a care powder after drying.

- Store the product in a clean, cool, and dry place. Avoid direct sunlight.
- To prevent chemical reactions, store the product separately and not together with other products made of different materials.

**The product does not hold firmly on the penis / insufficient friction.**

Hold the sleeve more firmly with your hand to reduce its internal diameter, or choose a model with a pump bulb to adjust friction.

**Insertion or movement is uncomfortable, the product slips.**

Apply a larger amount of water-based lubricant.

**An unpleasant odor is noticeable after use, or the material's color changes.**

Check that you are properly cleaning, disinfecting, and drying the product after each use according to the "Cleaning & maintenance" chapter. If the problem persists, stop using the product.

**The suction cup or pump mechanism does not work reliably (on selected models).**

Make sure the surface is clean, smooth, and dry; check the pump bulb for damage.

**Skin irritation occurs.**

Stop using the product immediately and follow the instructions in the "Safety information" chapter. If problems persist, consult a doctor.

**CAUTION**

If the problem persists even after trying the steps above, stop using the product and contact Lechtivo.cz customer support.

- Dispose of old products and packaging in accordance with national legal regulations.
- Separate packaging by material and dispose of it together with household waste.
- Non-electronic products can simply be thrown away with residual waste.

### ENVIRONMENT

By recycling, you contribute to protecting the environment and to the best possible reuse of raw materials.
