IMPORTANT

Keep all this information for safe and correct use. Also keep the product packaging, as it contains the instructions for use and information about the product, batteries, and charging. For more information, scan the QR code on the packaging.

Your safety is our top priority. Please read and follow all the instructions below carefully before using the product.

- Keep out of reach of children, as small parts may be swallowed.
- Use the product only if you are in good physical condition.
- Do not use the product on other people against their will. Use the product only with the consent of everyone involved.
- Use the product safely to avoid injury. Use the product at your own risk.
- If a person has any health problems or concerns, they should consult a doctor before using the product.
- Do not use the product on injured or irritated skin.
- If unpleasant skin irritation or physical discomfort occurs, stop using the product immediately. If symptoms persist, consult a doctor.
- To prevent illness and infection, do not pass the product on to third parties.
- Read the information on the product packaging carefully to avoid allergic reactions (e.g. to latex).
- Do not use the product if it is visibly not working properly, is overheating, or shows visible defects.
- Do not freeze or heat the product.
- The product is not suitable for commercial use.
- Do not inflate inflatable products beyond the diameter stated on the packaging.
- The product is not suitable for medical use.
- Charge the product only with a suitable charger in an electrical outlet. Follow the instructions for the relevant power adapter.

EMERGENCY VACUUM RELEASE

To release the vacuum in an emergency, insert a finger between the product and your body inside the vacuum tube. As soon as you hear a hissing sound, the vacuum will be released.

WARNING

No liability can be accepted for damage or accidents caused by improper use, the use of force, modifications, or failure to follow these safety instructions.

- Before first use, clean the product with warm water and mild soap. To avoid damaging the device, make sure no water gets into the battery compartment. Do not immerse the device in water.
- Charge the product or insert batteries (if included). For safety reasons, lithium batteries are usually charged to only 40–50% for transport.
- Familiarize yourself with the product's controls before use.
- To achieve an optimal seal and thus create a strong vacuum, shave the intimate area if necessary.

If relevant:

- Assemble the individual product components before use.

**CAUTION**

The product creates a strong vacuum. If you feel very unpleasant pain or other physical discomfort while using the product, open the pressure valve and remove the product immediately.

**CONTRAINDICATIONS**

This product must not be used by hemophiliacs or people with penile implants.

1

Apply lubricant

For an optimal airtight seal, apply a sufficient amount of lubricant to the inside of the sleeve and to the penis. Important: a water-based lubricant is recommended.

2

Insert the penis

Insert the non-erect penis into the vacuum tube while standing. Important: make sure the vacuum tube is seated firmly against the body.

3

Close the opening (if relevant)

Close the release opening of the vacuum tube with your thumb. If not relevant, continue with step 4.

4

Create the vacuum

Manual pump: squeeze the pump bulb or scissor handle, repeating as needed. Automatic pump: operate the control unit. Important: if no vacuum forms, check that the tube is seated against the body and that the release opening is sealed.

5

Regulate the vacuum

Manual pump: briefly remove your thumb from the opening to release the vacuum. Automatic pump: briefly press the pressure-release button.

6

Repeat (if relevant)

To enlarge the penis, repeat steps 4 and 5 – continuous alternation between negative and normal pressure causes penis enlargement. If not relevant, continue with step 7.

7

Equalize the vacuum

Manual pump: remove your thumb from the release opening. Automatic pump: press and hold the pressure-release button.

8

Remove the pump

Remove the pump from the penis. Important: if the product switches off automatically when the battery is depleted, do not switch it back on – charge it using an electrical outlet instead.

Optionally (if relevant):

- Some pumps are specially designed to stimulate the glans. To do this, follow the steps in the "Usage – penis pumps" chapter and fit the vacuum tube over the glans.
- Some pumps have vibration. You can control it via the control unit to further heighten pleasure.
- Some pumps have a detachable hose. To increase comfort during use, disconnect the hose from the pump once the vacuum has formed – the vacuum will be maintained. To equalize the vacuum, reconnect the hose to the pump if needed.

**CAUTION**

The product creates a vacuum. If you feel very unpleasant pain or other physical discomfort while using the product, open the pressure valve and remove the product immediately.

1

Apply lubricant

For an optimal airtight seal, apply a sufficient amount of lubricant to the breasts or intimate area. Important: a water-based lubricant is recommended.

2

Position the suction cup

Place the suction cup(s) on the breasts or intimate area. Important: make sure the suction cup(s) sit firmly against the body.

3

Create the vacuum

Repeatedly squeeze the pump bulb to create the desired vacuum. Important: if no vacuum forms, check that the suction cup(s) sit firmly against the body.

4

Regulate the vacuum

To regulate the vacuum and allow air in, partially open the valve.

5

Repeat (if relevant)

To enlarge the breasts, repeat steps 3 and 4 – continuous alternation between vacuum and normal pressure causes breast enlargement. If not relevant, continue with step 6.

6

Equalize the vacuum

To equalize the vacuum after use, open the valve.

7

Remove the suction cup

Remove the suction cup(s) from your body.

**CAUTION**

The product creates a vacuum. If you feel very unpleasant pain or other physical discomfort while using the product, open the pressure valve and remove the product immediately.

1

Apply lubricant

Apply a sufficient amount of lubricant to the nipples and areolas. Important: a water-based lubricant is recommended.

2

Fit the rings (if relevant)

Fit the included retaining rings onto the suction cups. If not relevant, continue with step 3.

3

Fit the suction cup

Place the suction cup directly over the nipple.

4

Create the vacuum

Pump bulb: squeeze, repeating as needed. Screw type: make sure the vacuum disc is flush with the suction cup and turn the screw clockwise — the nozzles will straighten out.

5

Increase nipple firmness (if relevant)

Fit the retaining rings from the suction cup onto the nipples. Important: if you feel pain or other discomfort, remove the rings immediately. Wearing them continuously is not recommended, as it restricts blood flow to the nipples. If not relevant, continue with step 6.

6

Equalize the vacuum

Pump bulb: press and hold the pump bulb. Screw type: turn counterclockwise until the vacuum disc is flush with the suction cup. Any lubricant residue is pushed out and can be easily wiped away.

7

Remove the suction cups

Remove the suction cups from the nipples.

Optionally (if relevant):

- Suction cups with a pump bulb can also be used on the clitoris. To do this, follow the steps in the "Usage – nipple suckers" chapter and position the suction cup over the clitoris.
- Some suction cups have vibration. You can control the vibration via the control unit to further heighten pleasure.

The following rules apply to the rechargeable and battery-powered models in this category (automatic pumps, models with vibration).

- Charge the product only with a suitable charger in an electrical outlet. Follow the instructions for the relevant power adapter.
- Charge the product or insert batteries (if included). For safety reasons, lithium batteries are usually charged to only 40–50% for transport — fully charge the product before first use.
- If the product switches off automatically when the battery is depleted, do not switch it back on — charge it using an electrical outlet instead.
- To extend the life of the batteries and rechargeable batteries and to prevent damage to the product, remove the batteries from the product after each use, or unplug the product once the rechargeable battery is fully charged.

- After each use, let the product cool down before putting it away.
- After each use, clean the product with warm water and mild soap and disinfect it with a disinfectant solution suitable for the product. To avoid damaging the product, make sure no water gets into the battery compartment.
- To prevent any illness, clean and disinfect the product after each anal use before continuing to use it vaginally.

- Store the product in a clean, cool, and dry place. Moisture can damage the batteries and motor. Avoid direct sunlight.
- To prevent chemical reactions, store the product separately and not together with other products made of different materials.

No vacuum is forming.	Check that the vacuum tube or suction cup is seated firmly against the body and that the release opening is not leaking — see the "Usage" chapter.
The vacuum releases quickly.	Make sure the suction cup or tube fits snugly against the skin. Shaving the intimate area can improve the seal — see the "First use" chapter.
Pain or discomfort during use.	Immediately open the pressure valve and remove the product. Do not use if you have hemophilia or a penile implant.
Vibration is not working (models with vibration).	Check the battery charge level per the "Charging & battery" chapter.

**CAUTION**

If the problem persists even after trying the steps above, stop using the product and contact Lechtivo.cz customer support.

Do not dispose of packaging material or old devices in household waste. Recycle items whenever possible. Sort packaging by material and dispose of it accordingly. Do your part to protect the environment and hand in old devices at local collection points in accordance with national laws and applicable guidelines. Before handing in old devices at a collection point, remove any loose batteries and rechargeable batteries. Before disposing of old devices, make sure you have deleted all personal data from them.

Electronic waste

- The crossed-out wheelie bin symbol means this product must be handed in free of charge at an electronic waste collection point so it can be recycled for the best possible reuse of raw materials.

Batteries

- Batteries do not belong in household waste. As a consumer, you are legally required to return used batteries to public collection points or to retailers that sell batteries.
- Batteries containing hazardous substances are marked with a symbol and one of the following chemical symbols: Cd (cadmium), Hg (mercury), Pb (lead).
- Lithium batteries and battery packs may only be handed in at collection points when fully discharged. To prevent short-circuiting, insulate the terminals (e.g. with adhesive tape) before handing them in.

ENVIRONMENT

By recycling, you help protect the environment and enable the best possible reuse of raw materials.
