INSTRUCTIONS FOR USE

Self-Adhesive Products

This document is a **universal instruction manual valid for the entire Self-Adhesive Products category** (adhesive nipple covers, push-up and lifting tape, and other single-use and reusable adhesive products), not for a single specific product. It contains shared safety, usage, and care information applicable across the entire category.

IMPORTANT

Before first use, please read the entire instructions for use carefully and keep them for future reference — they are an integral part of the product. Also keep the product packaging, as it contains the instructions for use and product information.

Your safety is our top priority. Before using the product, please read and follow all of the instructions below carefully.

- Keep out of reach of children, as small parts could be swallowed.
- Use the product only if you are in good physical condition.
- Do not use the product on other people against their will. Use the product only with the consent of everyone involved.
- Use the product safely to avoid injury. Use the product at your own risk.
- If you have any health problems or concerns, consult a doctor before using the product.
- Do not use the product on injured or irritated skin.
- If unpleasant skin irritation or physical discomfort occurs, stop using the product immediately. If symptoms persist, consult a doctor.
- To prevent illness and infection, do not pass the product on to third parties.
- Carefully read the information on the product packaging to avoid allergic reactions (e.g. to latex).
- Do not use the product if it is obviously not working properly, overheats, or shows visible defects.
- Do not freeze or heat the product.
- The product is not suitable for commercial use.
- Do not inflate inflatable products beyond the diameter stated on the packaging.
- The product is not suitable for medical use.
- No liability can be accepted for damage or accidents caused by improper use, use of force, modifications, or failure to observe these safety instructions.

**WARNING**

If you feel very unpleasant skin tension, irritation, bruising, discoloration, or any other physical discomfort while using the product, remove it immediately.

1

Clean the skin

Remove any traces of oil, powder, perfume, or cream from the skin by washing with warm, soapy water. Important: residue left on the skin can reduce the product's adhesion.

2

Remove the protective film

If applicable, remove the protective film from the adhesive surface.

3

Application

Press the product firmly onto the desired area of dry, clean skin. Important: for placement or application details, see the illustration on the product packaging.

4

Removal

After use, carefully remove the product from the body and, where applicable, from clothing.

**SINGLE-USE OR REUSABLE?**

Whether the product is suitable for repeated use is stated on the product packaging. Stickers, adhesive tapes, and similar products are generally intended for single use only.

- The product cannot be machine-washed.
- Clean the product with warm water and soap after every use. Let it dry thoroughly (do not tumble-dry) and store it away from plastic bags.
- To extend the life of the adhesive surfaces, reapply the protective film to the product after each cleaning.

**IMPORTANT**

To prevent lint from forming on the adhesive surface and to preserve the product's adhesion, do not clean it with a cloth.

- Store the product in a clean, cool, and dry place. Avoid direct sunlight.
- To prevent chemical reactions, store the product separately and not together with other products made of different materials.
- Keep out of reach of children.

**The product does not stick well to the skin.**

Make sure the skin is clean, dry, and free of oil, powder, perfume, or cream residue — these reduce adhesion.

A reusable product has lost its adhesion.

Reapply the protective film after cleaning; if adhesion does not return, replace the product.

The skin is irritated after removing the product.

Stop using the product on that area. If irritation persists, consult a doctor.

Lint is forming on the adhesive surface.

Do not clean the surface with a cloth — clean it only with warm water and soap, as described in the “Care of reusable products” chapter.

**CAUTION**

If the problem persists even after trying the steps above, stop using the product and contact Lechtivo.cz customer support.

- Dispose of old products and packaging in accordance with applicable legal regulations.
- Separate packaging by material and dispose of it together with household waste.
- Non-electronic products can simply be thrown away with residual waste.

THE ENVIRONMENT

By recycling, you help protect the environment and support the best possible reuse of raw materials.
