Contents

01	Before first use	3
02	General information for latex	4
03	Vinyl care	5
04	Latex care	6
05	Leather care	7
06	Troubleshooting common issues	8
07	Disposal & recycling	9
08	Responsible person & contact	10

IMPORTANT

Before first use, please read this entire instruction manual carefully and keep it for future reference — it is an integral part of the product.

- Before first use, clean the product according to the care instructions for its material (see the following chapters).
- Wash items of the same colour only together.
- Wear and wash items with stones, pearls, sequins and other embellishments with special care.
- Always wear underwear when trying on our clothing.

- The product is made using natural rubber latex, which may cause allergic reactions.
- Before putting the item on, lightly dust the inside of the latex garment with latex powder, or use a special oil suitable for latex products. This makes it easier to put on and protects the product from damage such as tears.
- Latex is extremely stretchy, but also easily damaged. When handling latex, avoid sharp objects such as hairpins, jewellery and long fingernails.
- Roll up stockings, tights and gloves as much as possible.
- Before putting the item on your fingers or toes, squeeze the air out of it. Roll it back up again without letting air back in.

- After each use, hand-clean the product with clean lukewarm water and a mild cleaning agent.
- After washing, dry the product with a soft, lint-free cloth.
- Lay larger items out on a towel to dry. Let the inside dry first, then the outside. Make sure zips, details and pockets are completely dry.
- Store the product in a clean, cool and dry place. Avoid direct sunlight and high humidity.
- To prevent chemical reactions, store the product separately, not together with other products made from different materials.
- Avoid storing it together with items of different colours or in (dark) plastic bags — this can cause discolouration. If needed, use a cotton garment bag, or hang a soft cloth or tissue paper between garments.
- Vinyl garments tend to wrinkle. To keep the product wrinkle-free for as long as possible, hang it on a hanger after cleaning.

- After each use, hand-clean the product with clean lukewarm water and a special cleaning agent or mild soap. Rinse off any soap residue with cold water.
- After washing, dry the product with a soft, lint-free cloth.
- Lay larger items out on a towel to dry. Let the inside dry first, then the outside. Make sure zips, details and pockets are completely dry.
- Once completely dry, lightly dust the product with latex powder before storing.
- Store the product in a clean, cool and dry place. Avoid direct sunlight and high humidity.
- To prevent chemical reactions, store the product separately, not together with other products made from different materials.

**TIP**

If you want a high-gloss finish, we recommend using a latex shine spray.

- Before first use, treat the product with a commercially available leather impregnation spray. It has a water-repellent effect and reduces susceptibility to staining.
- For light stains and dirt, use a soft damp cloth or soft brush together with a special leather-care product.
- For stubborn stains or a full clean, take the product to a specialised leather cleaner.
- Lay larger items out on a towel to dry. Let the inside dry first, then the outside. Make sure zips, details and pockets are completely dry.
- Store the product in a clean, cool and dry place. Avoid direct sunlight and high humidity.
- To prevent chemical reactions, store the product separately, not together with other products made from different materials.
- To prevent metal corrosion and possible mould on the leather, let the product dry thoroughly and store it outside plastic bags.
- From time to time, treat the leather with a commonly available leather-care product.

**NOTE**

Additional care instructions can be found on the product packaging or on the item's care label (tag).

The latex item is difficult to put on.

Lightly dust the inside with latex powder, or use a special latex oil as described in the "General information for latex" chapter.

A tear has appeared on the product.

Latex is easily damaged — avoid sharp objects. Do not continue wearing a damaged item and consider a professional repair if available.

The vinyl or latex item has lost its shine.

For latex, use a latex shine spray as described in the "Latex care" chapter; for vinyl, treat it as described in the "Vinyl care" chapter.

The leather item shows signs of moisture or mould.

Let the product dry thoroughly outside plastic bags and treat it with a leather-care product as described in the "Leather care" chapter.

**WARNING**

If the problem persists even after trying the steps above, please contact [Lechtivo.cz](https://lechtivo.cz) customer support.

- Dispose of old products and packaging in accordance with the legislation of your country.
- Sort packaging by material and dispose of it together with household waste.

ENVIRONMENT

By recycling, you help protect the environment and enable the best possible reuse of raw materials.
